## Mediamonkey app for iphone

The iPhone is not so much a smartphone because it is a phone app. That's the whole home screen really is - a gateway to apps. Tap an icon, launch an app. But what apps should you launch? Out of almost a million apps on the iPhone App Store, what are those new iPhone owners really need to have? What are the ones that will best help you with your work, hobbies, your responsibilities, and fun? Of all the apps, which deserves your attention? What are the best? In short - these. Based on years of experience and countless tests and comparisons, these are the apps and games we consider must-have, and we recommend that you download now. These are the best apps for iPhone. Participants in the Apple Worldwide Developers Conference got a glimpse of the new software coming in for all iPhones, including features for businesses, iPhone software development kit, a few new features, such as parental controls, additional languages, and some great-looking games. Note: When you purchase something after clicking on the links in our articles, we may earn a small fee. Read our affiliate link policy for more details. Along with contributing to the back page of the *funnies* every month of *Fast Company* magazine, a video from the *rooftop* Comedy crew will be shown every week on *fastcompany.com*. *RooftopComedy.com* record live comedy every night of the year, with a global network of comedians satirizing everything from the boardroom to the bathroom. You can see more of the Comedy rooftop work by clicking here. While the iPhone can't cure lepers or turn water into wine, it can help you do a lot of other useful things, such as sharing high-resolution videos, diagnosing your own diseases and even creating your own virtual life form! With Apple's iPhone App Store due to go online today, we decided to take a look at some of the most interesting third-party programs, apps and websites that have been developed to help make your iPhone an integral tool for both work and fun. For IT departments that want to have more control over how iPhones interact with their networks, Azaleos has expanded its OneStop remote email monitoring services to the new iPhone 3G. Azaleas, a Seattle-based company that has traditionally provided e-mail management for BlackBerry and Windows Mobile devices, uses Microsoft ActiveSync technology to bring mobile devices under the control of its OneStop service, a subscription offering that provides monitoring, maintenance, and 24-hour management. The OneStop service is part of the OneServer package from Azaleos that implements a on an IT network that provides an active/passive, error-tolerant, and corporate messaging platform. Funambol's Open Source Wireless SyncFunambol, an open-source software development company that specializes in mobile application servers, is now providing a free open-source email sync application for iPhone. Starting this week, iPhones will be able to sync Management (PIM) data for free through the company's myFUNAMBOL portal to popular email systems, such as Gmail, Yahoo and AOL. The Funambol wireless sync platform, which is supported through ads, is also available on Windows Mobile and Blackberry devices and will soon be available on Google Android devices. The software for the application can be downloaded directly from the myFUNAMBOL website. For anyone tired of having their wallet or overstuffed bag with business cards, 211me's paperless business cards might just be your ticket. 211me, which describes itself as a mobile mash-up company, allows users to generate their own cards, flyers and promotions designed specifically for mobile phones. This way, companies can create digital business cards for their employees or design promotions that can be sent electronically to any mobile phone in the U.S. Any flyers and business cards can also be shared on social networking sites, such as Facebook and Friendster, the company says. Users can design their own content by uploading their photos to the 211me website, where they can choose from a wide variety of backgrounds and text styles. The concept behind RemindYou is remarkably simple -- essentially, its goal is to make sure you never miss another meeting again. And it's doing this, you ask? Well, by syncing with iCal, Outlook, or Entourage and then overlaying a graph of all appointments over the iPhone start-up image. So instead of seeing an image of Earth from space as the default home screen every time you unlock your iPhone, you'll see a list of all appointments. RemindYou can be purchased from the iPhone 2.0 App Store for \$19.95 for a lifetime license. While the iPhone has revolutionized the way we browse the web on mobile devices, it may initially pose problems for new users who are not used to typing on such a compact space. Nuance is now working on bringing its voice recognition technology to the iPhone to drastically reduce the need for users to nibble away at qwerty keyboards. It works like this: launch your app from the iPhone startup menu, click a talk button once the app launches, verbally tell you what you want to search for, and then click stop. The program will then translate the words into text and perform an Internet search for you. You can watch demos of the software, which is still a prototype and will not be ready for release until the fall on Nunace's website. By now, everyone knows that iPhone 3G will support Microsoft Exchange ActiveSync and Cisco IPSEC VPN to provide enterprise customers with at least some security assurances for sending and receiving corporate emails. HyperOffice, however, wants to give you Much. By signing in to your individual HyperOffice account through your iPhone's web browser, you'll have access to apps like managing documents with online storage and comments, discussion documents, calendars, contacts, projects, and shared tasks. Because HyperOffice is a service, users do not need to download it from AppStore and can access it exclusively through the company's website. The service is currently priced at \$7 per month per user, and can also work on all smartphones and BlackBerry devices. Is there anything more fun than developing your own strange creatures that evolve from single-celled organisms? OK, so it may not sound like everyone's cup of tea, but that doesn't mean that everyone can't enjoy Spore, the weird lysing strategy game at Electronic Arts, which will be one of the pilot games to make their way to the iPhone platform. After it was shown earlier this year, the iPhone version of Spore will provide users with touch-screen capabilities in designing their custom creatures, from their genesis as unique cells to their eventual evolution into intelligent, cooperative species. By using mpeg-4 h.264 standard video codec and allowing users to upload videos of any length, mDialog is working to become a high-resolution version of YouTube. In addition to offering standard features, would be able to vote, rate and comment on videos, mDialog also allows users to deliver fully customizable surveys to get detailed reactions and tips from their audience in real time. Specially adapted for Apple TV and iPhone, as well as general internet, mDialog offers users up to 1GB of free video storage with monthly membership plans of \$4.99 for 8GB of storage, \$9.99 for 20GB of storage and \$24.99 for 50GB of storage. MDialog can be accessed via the Web and cannot be purchased through the App Store.Checking out baseball scores on the iPhone is one thing; Checking out the official game is quite another. Jumping early on the iPhone 3G bandwagon, Major League Baseball has developed an app called MLB La Bat, which will give fans show off video of games on their iPhones literally moments after they appear. Currently, MLB plans to offer MLB La Bat for an annual fee of \$4.99. The app will be available when the iPhone App Store launches on July 11. Pentaho, an open-source business intelligence app developer, has developed an iPhone web application that provides employees and management with mobile access to crucial company data, such as inventory reports, financial statements, income statements and sales reports sorted by customers, territories, and product lines. A demonstration of the open-source pentaho iPhone application, which specializes in providing mining business data and analytics, can be seen on Pentaho's website. Over the past two years, Twitter has taken the online world by storm as a happy environment between blogging and Allowing users to post up to 140-character updates on their Twitter social networking pages, Twitter has emerged as a popular way for people to provide real-time updates about their work and the lives of their friends and Twitterific, an interface developed by software company Iconfactory, is specifically designed to provide Twitter capabilities to Mac users and was available for prison-broken iPhones last year. It will officially come to the iPhone later this week. For fans of old-school eight-bit graphics games comes Bomberman Touch (see below) from the legendary Japanese gaming company Hudson Soft. Bomberman tells the captivating story of a robot unhappy with the manufacture of bombs that tries to get rid of its job at the factory by blowing a lot of things up. To win the game, you must guide Bomberman through several mazes while staring down feared enemies that look like giant frowned-out balloons. Like Pac-Man and Donkey Kong, Bomberman is a timeless classic who should make a successful transition to the iPhone world. Worried about that cough that looks like it's not going to go away? Are you worried about that leg irritation that costs you to sleep at night? Don't be afraid, because the a.D.A. information and health benefits technology company, M, has developed a Web application that allows users to match their medical symptoms with potential assessments and treatments. In addition, the navigator allows users to know when they can help themselves by self-depleting or whether they should consult a medical professional. The company says that its medical data and information is provided from its medically reviewed and UAC-accredited Health Encyclopedia.If 8GB of iPhone storage is not enough for you, give syncplicity online storage service a try. Syncplicity lets you store up to 2GB worth of documents, images, music, and video for free, and allows you to instantly access them on your iPhone from the cloud. All you need to do to access the stored data is connect to Syncplicity's website and then browse through the stored documents. Syncplicity currently offers 40GB of storage for \$9.99 per month (\$99.99 per year), and the company will add 100Mb to your account for each referral you provide. A fine tool for anyone looking to get into a round of golf on vacation or on a business trip, GolfFlyover can offer iPhone users with three-dimensional flyover maps of more than 10,000 golf courses in their entirety across the United States. By the end of the year, the website designs that every golf course in the United States will be mapped. All information about the golf course is provided free of charge and no members need to be provided to view the maps. An oldie, but goodie, AOL's Instant Messenger is one of the classic web apps for chatting and keeping in touch with your friends. Suppose you want to bid online for a 1955 Gibson Les Paul Junior but you don't have time to stand in front of a computer screen all day. Simple! Just carry around your iPhone and use eBay native iPhone apps to get constant updates whenever the punk that's called Gtfranc62 has exceeded your offer. The eBay app is free and available at the App Store.Not wanting to be left behind in the online, online media world, AP has created a mobile news network to provide readers with the latest headlines on politics, sports, business and entertainment. The iPhone app is free and available at the App Store.Although it looks like an app developed specifically for stalkers, The Loopt Social Network Mapping Tool is actually a location-based program designed to allow you to see where your friends are staying in your area. Essentially, whenever someone on the custom friends list is signed onto Loopt through their BlackBerry, iPhone or other compatible wireless device, Loopt will track them for you on a map that is customized for wireless devices. If you don't want to be found at a certain time, of course, you can sign out of Loopt or change your privacy settings. A quick reference for all drug-related questions, the Epocrates drug database gives you information on drug uses, recommended dosages, prices, interactions with other drugs and potential side effects. This is another app that is currently available in the App Store. This story, 20 Cool iPhone Apps was originally published by Network World. Note: When you purchase something after clicking on the links in our articles, we may earn a small fee. Read our affiliate link policy for more details. Details.
